

REPORT
OF THE
INSPECTORS OF PENITENTIARIES
FOR THE
FISCAL YEAR ENDED MARCH 31
1914

PRINTED BY ORDER OF PARLIAMENT

OTTAWA

PRINTED BY J. DE L. TACHÉ, PRINTER TO THE KING'S MOST
EXCELLENT MAJESTY

1915

[No. 34 — 1915]

*To His Royal Highness, Field Marshal, Prince Arthur William Patrick Albert,
Duke of Connaught and Strathearn, K.G., K.T., K.P., &c., &c., &c.,
Governor General and Commander in Chief of the Dominion of Canada.*

SIR,

I have the honour to lay before Your Royal Highness the Annual Report of the Inspectors of Penitentiaries for the fiscal year ended March 31, 1914, made by them in pursuance of the provisions of section 19 of the Penitentiary Act.

I have the honour to be, Sir,

Your Royal Highness's most obedient servant,

CHAS. J. DOHERTY,

Minister of Justice.

OTTAWA, August 25, 1915.

ANNUAL REPORT
OF THE
INSPECTORS OF PENITENTIARIES
FOR THE
FISCAL YEAR 1913-1914.

To the Honourable
CHARLES J. DOHERTY, K.C., D.C.L., LL.D.,
Minister of Justice.

SIR,—We have the honour to submit herewith reports and statistics with reference to the administration and operation of the penitentiaries of Canada for the fiscal year ended March 31, 1914.

POPULATION.

1909-10.....	1,824
1910-11.....	1,834
1911-12.....	1,853
1912-13.....	1,911
1913-14.....	1,946

It will be noted that the issue of licenses is being extended year by year without any appreciable increase in the percentage of lapses. More than 20 per cent of the inmates have in this way been given a “second chance,” with very satisfactory results. The report of the Dominion Parole Officer (Appendix A) indicates that great care has been exercised in the placing and supervision of licensed convicts.

The following table shows the extent to which clemency has been exercised since the adoption of the system of parole in 1899:—

COMPARATIVE STATEMENT OF PAROLES AND PARDONS.

—	Paroles.	Pardons.	—	Paroles.	Pardons.
1899-0.....	71	70	1907-8.....	215	29
1900-1.....	122	36	1908-9.....	244	14
1901-2.....	157	43	1909-10.....	286	17
1902-3.....	113	35	1910-11.....	334	15
1903-4.....	122	31	1911-12.....	380	17
1904-5.....	126	50	1912-13.....	445	3
1905-6.....	179	36	1913-14.....	480	5
1906-7.....	157	29			

CLASSIFICATION OF CRIMES.

Any attempt to classify the crimes of those in custody must be more or less arbitrary, but a general idea may be obtained in the following table:—

Offences against the person.....	590
Offences against property.....	1,186
Offences against public order, generally.....	227

In the case of a sentence that indicates offence against more than one of the above classes, it is classified according to the apparent object of the crime. For example “assault and robbery” is classified as an offence against property—the assault being merely incidental.

SESSIONAL PAPER No. 34

AGE.

Two per cent of the population are over 60 years of age, and 8 per cent under 20. Those under 20 are generally lads who have been "reformed" previously in provincial reformatories where the essential element of discipline or obedience to authority was not enforced. When supplied with the lacking essential they become fit subjects for parole.

DURATION OF SENTENCES.

Five per cent are serving life sentences, and twenty-five per cent are serving the minimum sentence of two years.

EDUCATION.

The illiterate constitute 12 per cent. The four western institutions show a better record of education than that of the eastern penitentiaries.

TREATMENT OF CONVICTS.

In view of the determined efforts of ill-informed critics who have sought various and questionable methods of discrediting the management of the Canadian penitentiaries, it seems necessary to refute the attempts by facts that are beyond question. In comparing different systems of treatment, it is necessary to remember that the paramount object of imprisonment is the protection of society by the repression of crime, and that the success of any system can be judged accurately by the results.

The result, in so far as Canadian penitentiary methods are concerned, is shown by the fact that but a small percentage of the present population were ever before in any of our institutions.

The allegation that our penitentiaries are "schools of crime" looks somewhat ludicrous in the light of actual facts.

In this connection it will be recalled that some recent experts have made the recommendation "that an arrangement be entered into with the provinces of the Dominion to take over the custody of first offenders and prisoners under 25 years of age." If the suggestion be adopted, it will leave but a small proportion of our present population remaining—the provinces taking over the others, including nearly all the life prisoners and the majority of other criminals who are physically dangerous. Such recommendations are obviously impracticable, and could emanate only from those who have no experience in the management of penal institutions or knowledge of criminal character.

The recommendations of the experts, as recently published, may be divided into three classes:—

(1) Practical suggestions abstracted from previously published official reports, without credit or reference to the reports from which they were taken.

(2) Reactionary suggestions regarding the reintroduction of practices and abuses that have been eliminated long since for good and sufficient cause and with benefit to the institutions.

(3) Original recommendations, of which the one before referred to is a fair sample.

5 GEORGE V, A. 1915

URBAN CRIMINALITY.

Four cities contribute one-third of the entire penitentiary population. The following table indicates the number received from urban centres:—

Place.	No.	Place.	No.
Montreal.....	273	New Westminster.....	41
Vancouver.....	183	Sydney.....	40
Toronto.....	110	Halifax.....	36
Winnipeg.....	100	Hamilton.....	32
Edmonton.....	54	Ottawa.....	29
Calgary.....	50	Regina.....	28
Quebec.....	48	Moosejaw.....	27
Victoria.....	44	Kamloops.....	27

In the methods pursued for the repression of crime, the pendulum of public opinion, for several centuries, has been oscillating from one extreme to another. Severity occasionally leads to a revulsion of sentiment that is followed by a period of sentimentalism equally dangerous to society—which in turn causes public opinion to revert to the “cat and the triangle.”

In the conduct of Canadian penitentiaries it has been the policy to avoid both extremes as inconsistent with proper management, and to adopt methods of treatment that are humane and are also effective for the purpose intended by the sentence.

Brutality and coddling have been avoided as equally dangerous—the former because it incites revenge against society, and the latter because it invites and encourages criminality by making the way of the transgressor easy.

From time to time well-meaning enthusiasts have advocated moral suasion as the proper method of dealing with criminals. No matter how ancient the theory or how frequently it has been exploded, sentimentalism is still paraded as “modern” penology, “modern” methods, etc., as a catch cry. Ever since Eve was comforted by the false assurance “Ye shall not surely die,” there have been those who have insisted that wrong-doing should not be followed by penalty, but that the criminal should be rewarded with comforts, privileges and advantages that tens of thousands of law-abiding citizens in this country do not enjoy. This agitation for the encouragement and propogation of crime can boast of its origin and antiquity, but is in no sense modern.

During the past three years a vigorous and determined effort has been made to discredit Canadian penitentiary management, and eventually, in desperation, methods were resorted to that have no precedent in the records of official investigation. In the absence of reliable evidence, the scum of Canadian criminality and even insane convicts were called, their sworn “evidence” recorded and published in the local press as facts. The publication of these scurrilous, false, and filthy statements was continued for days and weeks under the caption of

SESSIONAL PAPER No. 34

"Startling Revelations," "Disgusting Disclosures," "Hell in a Hollow," and other hysterical headlines, with the obvious intention of discrediting the institution and injuring the reputation of its officials. It is only necessary to consider the character of the methods adopted to realize that whatever discredit may result will not attach to the institution.

An examination of the three books of revelation, labelled "evidence," which accompanied the report of the experts, fails to disclose a single case of cruelty, inhumanity, or wilful injustice to any convict, substantiated by evidence that would be accepted as such in any police court in the country. Any evidence of that character that might be admissible was fully rebutted and disproved by witnesses whose veracity is beyond question.

The allegation that there has been abuse in the infliction of prison punishments is met by the official records. No prison punishment can be inflicted except by the authority of the warden. No punishment was ever authorized or inflicted on an inmate of the insane ward, although false statements to that effect have been made and published. When an insane convict defies authority and refuses to take his periodical bath, sanitary reasons oblige the officers to compel him to submit. This is not punishment. To omit to enforce sanitary regulations would be deemed a serious neglect of duty on the part of the responsible officers.

As regards the general infliction of prison punishments the records show that during the past year, 60 per cent of the population received no punishment whatever—not even the minimum meal of bread and water. Convicts who are defiant of authority, and incorrigible, are subdued by application of the hose. Those who received this form of punishment during the year constitute one-half of 1 per cent of the population. If any one thinks that this record justifies the allegation of abuse they are entitled to another guess. Facts are stronger than fiction.

We place little reliance on the opinions of experts who are unable to distinguish between originality and plagiarism; between reform and reaction; between humanity and inanity; between sane suggestion and sloppy sentimentalism.

The administration of penal institutions is too important to be used as the object of political caprice or for the experiments of misguided enthusiasts. The recommendations that have been made from time to time by your officials were not based on the statements, opinions, or wishes of convicts, sane or insane, but upon observation and practical experience. In our last annual report we urged as fundamental reforms:—

1. That the penitentiaries shall be administered by the Minister, through his responsible officers, and free from local or other external interference.

2. That the Government shall utilize the obligatory labour of its wards in supplying, so far as possible, its own needs and requirements.

We are of opinion that the adoption of these basic reforms would remove any real grievances that may exist.

Respectfully submitted.

DOUGLAS STEWART,
W. S. HUGHES,

Insp. 2018.

OTTAWA, August 18, 1914.

APPENDIX A.

DOMINION PAROLE OFFICER'S REPORT.

To the Honourable,

CHARLES J. DOHERTY, K.C., D.C.L., LL.D.,

Minister of Justice,

Ottawa.

SIR,—I have the honour to submit to you the annual report on the parole system for the fiscal year ended March 31, 1914.

ITINERARY.

During the past fiscal year I have visited the penitentiaries and several provincial institutions in connection with the parole system, and have interviewed 864 prisoners. I have also given those on parole the best encouragement and oversight I am capable of giving. I desire to thank the various Prison Aid Societies, the Salvation Army, the secretaries of the Young Men's Christian Associations, and the Reading Camp Association for their hearty co-operation in the placing of prisoners, especially those who have had no friends to assist them in the critical hour of their leaving a prison and being placed upon their honour. Also I have been able (through correspondence principally) to place over 600 of those released on parole with friends or patrons, in addition to those assisted by societies, and it is gratifying to know that so many released on their honour have responded to the various efforts made for their uplift, and are proving good.

PAROLE STATISTICS OF FISCAL YEAR.

During the past fiscal year, 486 prisoners were released on parole from the penitentiaries, and 558 from the prisons, jails, and reformatories of the Dominion—in total, 1,044. The number of revocations for non-compliance with conditions of license for the past fiscal year was 57, or $5\frac{1}{2}$ per cent, and the number of forfeitures for subsequent convictions was 47, or $4\frac{1}{2}$ per cent. The total number of delinquents for the past fiscal year is 104, or 10 per cent. The number of prisoners who completed their paroles during the fiscal year was 455, and the number who have not completed, and who are still reporting, is 485.

The delinquency percentage for the past year looms rather large. Following up the comment suggested in a previous report a few year ago, when citing the increased number of releases, it was demonstrated that the percentage of losses must naturally grow larger as the system is extended. Considering all the facts connected with giving these prisoners a chance to redeem themselves on parole, the percentage of delinquency is not yet abnormally large. Even if 90 per cent demonstrate themselves worthy of a trust, the parole movement still has a magnificent showing; but should the parole system be extended to every prisoner in our penal and reformatory institutions, I do not think over 55 or 60 per cent would prove satisfactory.

Take, for an illustration, the penitentiaries which have a population now of nearly 2,000. In the early years of the parole movement, when 150 or 200 inmates were released the percentage of delinquency aggregated a much smaller percentage than at the present time, when nearly 500 are released annually. The discrimination or consideration given could not be expected to be as effective in the releasing of a larger number in proportion to the few selected in the early days of the administration, hence the larger increase this year in the number of revocations and forfeitures over any previous years. But it is hardly fair to

take one year as a criterion or opinion. Quite a number of the cancellations revealed in the figures of this year revert to the year previous, or to several previous years. Especially is this found in the penitentiary cases, where they are expected to report up to the expiration of their sentence. I beg to suggest that prisoners at large, after reporting from two to three years, and living within the law, be relieved from reporting, and the parole extended to a full pardon. To my knowledge, some of the prisoners at large have been reporting regularly for five or six years, and are doing well. The parole, under these circumstances, while it has been a safeguard in the early stages of the prisoner's probation, ceases to be a protection after a number of years, and produces, without a shadow of a doubt, a serious handicap if held too long over the prisoner. I have repeatedly urged the authorities to grant prisoners at large the clemency of a full pardon after they have been reporting for two or three years, if their conduct be exemplary.

STATISTICS SINCE THE INCEPTION OF THE ACT, 15 YEARS AGO.

Since the inception of the Act, fifteen years ago, 6,540 prisoners were released on parole. Of this number, 3,454 were from the penitentiaries, and the balance (3,086) from the prisons, reformatories, and jails. The number of paroled prisoners who have completed their sentences at large is 5,418, and we still have 704 reporting. The number of forfeitures for subsequent convictions is 192, or 2.9 per cent, and the number of revocations for non-compliance with conditions of license is 226, or 3.5 per cent.

The correct criterion in summing up the effective work of the parole system must be taken from the entire figures. These figures reveal that 192 have committed offences and were returned on subsequent conviction, and forfeited their license; also that 226 prisoners were not altogether satisfactory in their reporting, and consequently their licenses were revoked for breach of regulation. The entire loss to the system thus far is 418, or 6.4 per cent.

The above figures are identical with those furnished by the Commissioner of Dominion Police.

PENITENTIARIES.

Number of prisoners released on parole for the fiscal year ended March 31, 1914:—

	Men.	Women.
Kingston.....	114	2
St. Vincent de Paul.....	84	
Dorchester.....	48	2
Manitoba.....	63	
British Columbia.....	76	
Alberta.....	61	1
Saskatchewan.....	35	
	481	5
Penitentiaries—total.....		486
Prisons, jails, and reformatories.....		558
Grand total.....		1,044

NOTE.—The divergency (3) in my figures from the penitentiary reports is caused by paroles being issued and refused by prisoners in the last few days or months of their sentence.

SESSIONAL PAPER No. 34

There is considerable variation this year in the numbers returned to the penitentiaries on forfeitures and revocations, and I beg to submit the following figures:—

	Returned.	Number returned.	Percentage.
St. Vincent de Paul	84	14	16.6
Kingston	116	14	12.0
Dorchester	50	7	10.6
Alberta	62	3	4.8
Saskatchewan	35	1	2.8
British Columbia	76	-	-
Manitoba	63	-	-

Five women were released from the various penitentiaries, and it is creditable that not one violated her parole during the year.

I beg to suggest a few changes in connection with the operation of the parole system. In the working of the ticket-of-leave at the present time we place the convicts almost absolutely under the control of the police authorities in their reporting. I beg to suggest the appointment of parole officers, in the leading centres, who would gradually replace the police officers in the oversight of paroled prisoners, and only appeal to the police in cases of neglect or failure of the prisoner to respond to a moral or reasonable restraint. The ticket-of-leave system brands a man in calling his license a "ticket-of-leave," and this attaches a stigma and a handicap in his endeavour to reinstate himself in society outside of a prison. Where the reforms of the convict is earnestly and honestly sought in almost all civilized countries, the word "parole" or "conditional liberation," has been substituted for "ticket-of-leave." I have repeatedly urged, in my memoranda, the authorities to change this unnecessary handicap attached to a prisoner's license. He has sufficient of an uphill struggle without this added disadvantage. History demonstrates that the old system of "ticket-of-leave" in several countries has been associated with the most diabolical cruelty and suffering ever imposed on a penalized humanity, and the term "ticket-of-leave" can never be mentioned by the public without the knowledge of its past record. The word "parole" signifies that a man is placed on his honour and trusted to a certain extent. For these reasons, I humbly beg to suggest that the word "parole" be inserted wherever the words "ticket-of-leave" have been placed on the license and in the Act.

Under a well-organized parole system, the reporting could be managed through federal parole officers, appointed to various provinces requiring the time and oversight of such officers. The work imposed on the police in receiving all the reports of men on parole is very arduous and, as a rule, they do not care to be responsible for the prisoners' reporting. They seldom undertake to look after a man on parole or discover the reasons for his non-reporting or delinquency. Should he commit a crime they then feel it their duty to deal with him. Under these circumstances, I beg to suggest that federal parole officers be appointed in several provinces where the work would demand their full time and attention in the oversight of the parole system, and held under federal authority. That officers have been needed in this capacity, I beg to call attention to my report in 1905 making a suggestion that the provinces appoint parole officers to look after the prisoners released from the prisons, jails, and all provincial institutions, but I have found the provincial authorities indifferent in this matter, and they state that all releases or pardons are in the hands of the Minister of Justice, under federal authority, and that those who take the responsibility of the

5 GEORGE V, A. 1915

liberation of a prisoner from any jail, prison, or penitentiary, should be responsible to provide qualified officers for the oversight of all such prisoners while on parole. Many prisoners serving a first term may be released with safety under the supervision of a patron or the society interested providing him with employment. Federal parole officers appointed in a province would have within their jurisdiction ample scope for their energies in visiting these men and keeping them within their conditions of license, and supervising the work carried on by the societies in connection with the parole system. In event of lapses or any paroled prisoner becoming unmanageable and violating the obligation under which he is held by the parole license, the authorities or patron should report him immediately to the police, and hand him over to be dealt with according to the law. Should the suggested system be carefully organized it would save the police a large amount of work, and make the parole system much more effective in its oversight.

Although the conduct of a prisoner while in custody cannot be accepted as a safe criterion or index of character, I think that no man should be released on parole who has openly defied the prison regulations and failed to respond to penitentiary treatment. The inspectors of penitentiaries have informed me that the wardens have been very much embarrassed in their management of their institutions where releases have been ordered when the prisoner at that time was undergoing punishment for infractions of the discipline and regulations of the institution. The release of a man who defies discipline discourages well-behaved prisoners. The warden's recommendation should be very carefully considered under these circumstances.

Parole officers, eventually, would have the nucleus of a very strong organization which could be operated in connection with the "suspended-sentence system." Some years ago I had occasion to make inquiries into the probationary system in the state of Massachusetts, where probation officers are attached to the state and receive all men and women who are given, what we in Canada term, a suspended sentence. The clause in the Canadian Criminal Code authorizing the judge or magistrate to exercise the suspended sentence on a first offender is one of the best reform movements we have, but to make it effective the system needs the probationary officer to receive at the court all such cases and give them a careful oversight. It is the duty of the probationary officer to arrange for all prisoners given over by the court on suspended sentence, their employment and social environment; also to see that they make restitution, as far as they possibly can, for any wrongs inflicted on a community or individual by their anti-social act. Ninety-five per cent of the men and women released during the past ten years in the state of Massachusetts on a suspended sentence, as we term it, or the probationary system, when embracing the oversight by officers especially appointed by the Government, proved satisfactory. I have often met cases in our penitentiaries and jails where I felt, as far as the reformation of the convict was concerned, that the very apprehension of his offence and subsequent trouble from the loss of character and social status, inflicted a sufficient punishment and would act as a deterrent to his ever committing an offence of this character again. Had we a thoroughly organized probationary system so that a judge or magistrate could feel that the man would have a strict supervision and be held to the terms of his suspended sentence, many cases from the court could be handed over to the parole or probationary officers, and thus save the stigma attached to his name of having once been in a prison or penitentiary. I am satisfied, after years of service and personal contact with our prisoners, and in the study of these men from a criminological and psychological viewpoint, that many of our prisoners (had they never been sent to a jail, reformatory, or penitentiary) could have been reclaimed and made good citizens without weakening the arm of the law in its operation, by a thoroughly organized

SESSIONAL PAPER No. 34

suspended-sentence auxiliary to the parole system, which is now beyond any experimental state in reform movements. If there is, as demonstrated, a percentage of men in our prisons who can be trusted, and especially for the minor offences of the law coming under a provincial institution for treatment in a prison farm, etc., and placed on their honour, without the supervision of guards, a pertinent and vital question affecting political economics might reasonably be asked, to wit: If prisoners respond to treatment of this character while under custody for minor offences, why should they be incarcerated at all, or punishment inflicted upon them by the disgrace attached to serving of a criminal sentence. Under the probation system, restitution as far as possible could be made for their wrong inflicted on society, and they could be placed, not in a prison farm or reformatory institution for treatment, but on their honour with their old employers or some patron that has taken an interest in their behalf. I have gone carefully into the working of this law where it is in force, and I honestly believe it can be made a safe means, if adopted by our country, for the reconstruction and economic treatment of delinquents, and I earnestly beg the thoughtful attention of the minister to consider the advisability of appointing parole officers under this office and the adoption of the probationary system to work in conjunction with the courts (especially in our larger cities) where men might be placed on probation rather than be sent to a prison farm or a penitentiary for their first offence. I also beg to suggest that all prisoners now on parole who have been reporting for some two and a half to three years satisfactorily, and observing their license, be relieved from the responsibility of reporting and, where the minister considers it judicious, a full pardon granted.

PAROLE OR DISCHARGE FROM PRISON.

The most critical period or crisis in the life of a prisoner is reached on the day of his discharge from prison. During his service of sentence he has been required to obey, but not required to plan or decide upon his occupation outside. Day after day he has marched to his work, his clothes have been furnished, his food provided, and he has had no struggle for a living, as many have outside of prison walls. He has not been called upon to exercise any thought or care about the smallest necessities of life. The longer his imprisonment is the more wholly dependent is he when set at liberty. For months, nay, years, he has looked forward to this day as one of unalloyed happiness. Visions of the employment with which he would again earn his way have visited his pillow many a night in his lonely cell. Waking dreams of what he would do when he was his own master have come to him day after day, and now this day of days for him has come, and he changes the prison suit, and turns his back upon the walls that have so long circumscribed his view, eager to drink in the free air of heaven and taste to the full the happy freedom and liberty of the outside world. The sun never shone so bright, the air never filled his lungs with such a sense of health and relief as it now comes pure from the fields and forests of his native land. He fairly shakes himself with delight as he realizes that no warden can hold him and no guard can call to him "halt!" when he turns his face toward his old home. Perhaps he has a few friends left in the neighbourhood who will welcome him, to whom he hastens. Perhaps a mother waiting to clasp her wayward boy to her sorrowed heart, and pillow that sinning head upon a bosom that beats but to pity and love. If so, there is an abundant hope for his future. She may be very old and poor, but the mother's love remains and still serves to win the wayward boy back to the ways of rectitude and honest living. But all mothers, unfortunately, are not what they ought to be to their children. Some time ago I accompanied a broken-hearted mother to one of our penal institutions where she was having an interview with her boy who had gone astray, and was

5 GEORGE V, A. 1915

serving a sentence. The mother's grief was pitiful. She stated that she never felt that she had done her duty to her boy, and the boy in his conversation at that time, referred to the days of his boyhood and said "Oh mother, if I had only known." What a wonderful influence for good or bad a mother can wield. Canada needs more good mothers if the tide of our criminal population is to be checked. The neglect of early training is often reaped in the after life of the child, producing a broken heart, with scalding, bitter tears. Millions have proved a mother's love both a mantle and a shield. If a remnant of the true man remains, the paroled prisoner needs no outside aid, but in many cases the unfortunate person coming from the prison has no mother living, and very few friends, if any, to help him in his hour of need. This is where the parole system proves a potent factor in assisting men. In almost every case, employment and friends are provided before the prisoner is released, for I have always felt that no person should be discharged from a prison without a patron or a friend to go to, and employment or a good prospect of employment in view before discharge. I have known many to fall into temptation who truly intended to live an honest life when discharged from prison, but when looking for employment, discouragements came which they little expected. This past year I have placed 675 prisoners, released on parole, with friends.

We still have people inquire: "What is the parole system?" as many confound a "conditional liberation" with a "pardon." We are also met on the threshold of every discussion on the parole system with the statement that a parole is, in fact, a pardon, as the granting of a parole involves the highest power or prerogative of the Crown. This objection loses its force when we reflect that a pardon by the Crown is an absolute act of grace, not based upon such prior conditions as are necessary in the case of a parole. Again, a pardon is a complete act, the recipient of it goes absolutely free, acquitted of a crime, and vested again with the rights of full citizenship. The paroled person goes merely from one state of discipline and test into an enlarged one, where he must again show his fitness for further confidence and final liberation. He may be returned any time to custody on the violation of the conditions of his license.

Examination of the various methods for the release of prisoners demonstrates that the parole system produces a gradual restoration of liberty and citizenship to persons who have forfeited it by crime, under which the offender is trained and qualified by prison treatment for conditional liberty, and it stands second to none as a restorative and reformatory method.

It is coming to be generally believed that, as a class, so-called criminals are not so wilfully criminous as they are weak, and we find the weak ones need to be strengthened and invigorated with manhood. The criminal cannot be deterred from crime by punishment alone. The object of imprisonment is not only the protection of society, but the ultimate restoration of the criminal. A system that strengthens the wayward and holds an oversight of them till strength has been gained, may properly be designated a parole system.

The prisoners on parole for the past year in Canada have been earning, on an average, \$12.84 per capita per week as wage-earners, supporting their families and themselves, and living, as a rule, upright lives. Have you ever considered what it costs the country (over two thousand dollars, some one has figured out) for every man sent to prison in Canada. In the penitentiaries it means an annual cost of \$350 per capita while in custody. Yet there are some who object to spending a few dollars on the man discharged, with the object to help him regain his citizenship, keep away from prison, and earn an honest living. The primary object of the parole system is to prevent men from going further in crime, and to encourage them in honest pursuits of life; and results demonstrate, from the fifteen years' operation of this movement, that the money is well spent and the efforts for the uplift of prisoners beneficial to the community or state.

SESSIONAL PAPER No. 34

A question is often asked, "To what extent is the reformation of a criminal dependent upon religion?" I would answer that it is dependent to the extent of the completeness and security of the reform. Reform may begin with various different points of character. It may be of low origin. It may at the beginning be without religious motives or stimulus, but somewhere en route from its origin to its culmination, it must embrace religion. It must embrace the heart in order to make whole its work, "For out of the heart are the issues of life." The religion or reformation is not a form of doctrine or the work of a church or a religious organization, but an individual work of the heart accomplished by Divine Grace when the man turns his face toward his Maker. He will then remember his neighbour.

The parole system has been the means of working out many a heart reformation, for the system is based upon a belief in the essential oneness of criminal and non-criminal persons as sentient beings. Its methods proceed from the belief that the crimes of criminals are, in origin, development, and continuance, like the offences of any other persons; and for all defilement there must be, essentially, the same cleansing for each one, in order that every one may become correct in life. All criminality is of one origin, and its remedy is the same as that for perversity, turpitude, or waywardness, whenever and however found. Parole movements are then, essentially, operated along the line of a common humanity.

Within the purview of the parole system are the great number and variety of persons who have offended against property and persons, who have violated public morals and whom the law has designated as criminals. They have been given many names. Penology classifies them as professional, habitual, and accidental criminals. While a few of the first two classes are sometimes granted a parole under special conditions or circumstances, the great majority of those released on parole represent the accidental offender, and it is among this class that the parole movement is most potent and helpful in reconstruction. I have known quite a number of old offenders who have reached the crisis of life and have been bridged into good citizenship by the parole system. To the parole system they all are, as a body, a people of needs, entering into criminality by reason of mental, moral, physical, or industrial lack. It is generally found that they are to a certain extent barren of the very things which abound in good strong people, who have enriched their lives with honesty, honour, and truth. Therefore the parole method is that of implanting, uprooting the wrong, and the enrightment of the better forces found in all men. The system is one of hope and encouragement. The endeavour is to make paroled persons robust with integrity rather feeble in criminality; to implant a true conception of living, giving the expulsive force to the individual which will drive out the wrong. The parole system looks for the real man in every prisoner paroled, and when finding him seeks to qualify him with that liberty wherewith other men have been made free from that which was wrong in their lives and purposes. The parole system deals with the offender rather than his offence. It embraces each phase of character, his moral and physical needs. The parole plan does not proceed upon the fact alone that the man has been or is a murderer, or thief, or drunkard, but more upon the fact that he is a man gone wrong, astray from the path of rectitude and good citizenship, and may be brought back; that he is a person gone wrong but who can be made right and one whose trend of life may be changed. It seeks to have prisoners leave a prison with a hope and purpose, strengthened in will, equipped with skill, and endowed with industry from the lessons begun in the penitentiary, and to habilitate them as the case may be treated with the qualities and forces of good citizenship.

PENOLOGICAL.

There is considerable error in the general opinion of imprisonments in the modern prison, for many still think that it is actually a condition of painful punishment. Doubtless many prisoners would prefer not to go to a prison. As a child dislikes to take medicine intended for its benefit or health, so criminals, as a rule, prefer not to undergo curative treatment for their criminous characters. But the modern prison is not what the mind of the average citizen, who has given but little thought or attention to penological matters, thinks it is. The fact is, convicts in our penitentiaries have more and better food than the average working man outside, who has committed no crime, can have or afford to have. They have to be supplied with the best of medical attention absolutely free, and they receive both moral and industrial education gratis. Their rooms are generally well ventilated and provided with a comfortable bed. While their clothing may not be to their own taste, yet they are dressed warmly. The labour provided may not be of the higher grades of industrial service, yet many profitable trades have been taught the men, and hundreds of them have, on their discharge on parole or on expiration of sentence, been better equipped to earn an honest living than on entering.

Another popular error abroad is about prisoners themselves. There are two theories about a prisoner which largely determines the plan of his treatment in the light of modern penology. One view which is generally held by the major portion of our communities in Canada is that when a man is about to commit a crime he sees clearly the moral wrong of it, feels also the monitions of a healthy conscience, and is absolutely free to choose his course of conduct, choosing, out of the depravity of his heart, to commit a crime. This view may have led to retributive penalties in the administration of justice, but it still has a rational claim on all intelligent and sound-thinking people. Another view taken by professional criminologists differs somewhat in essence from the above. A synopsis of their argument might be cited as follows: Human conduct is the result of human organisms and energy. The apparatus by which purposive movements are actuated is found in the nervous system, and also the muscles, into which the nerve fibre is so intimately interlaced. These act only when stimulated by some form or force not steadily applied, but in a shock or a succession of shocks of force. The brain is rated as an accumulator and distributor, while the nerves and channels are vehicles and avenues in which it is conveyed. Energy is stored in the nerve cells and transmitted along the series of molecules in like manner as the impulse is communicated from one to the other. The channels into which currents frequently pass are channels which have become, from the fact of this frequent passage, scoured out to the appropriate calibre, and are able to convey the accustomed currents without leakage. The repetition of impressions stimulating the flow of energy between centres, enlarges and adjusts the channel until the connection between them becomes thoroughly organized and the course of action becomes habitual, increasing the facility of action, making new centres, and through combined action resulting in new modes of reaction, producing a new course of conduct.

The activity of the highest nerve centres by a nerve current set in motion by sense-perception, is attended by a corresponding variation in the mental processes. Molecular changes and nerve currents are attended by a change in what modern thinkers call mind; change of ideas, feelings, volitions, and it is constantly affirmed that there is no mental condition without a nerve process. The evolution of character, then, under the system of modern thought, and the reformation of it, is but the creation of habits or habitudes.

The doctrine of tissue degeneration, whether atavistic or formed by environment, as a cause of anti-social conduct is now attracting much attention,

SESSIONAL PAPER No. 34

particularly in the different schools of criminal anthropology in Europe; and they all quite agree that the source of conduct, including criminal conduct, is to be sought for in the material substance of the being, in an undeveloped, dormant, or diseased nerve tissue. Reformers who follow these schools of science begin their reformatory process by attention and treatment to the physical life, by the scientific renovation and training with modern appliances and by other more ordinary means for the large majority of prisoners.

The real criminal, if of subjective criminous character, must be treated scientifically. I care not at what viewpoint or angle we may approach the criminal, he requires the very wisest and best treatment any school or science can produce if an ultimate and lasting reformation is earnestly sought. Without any further comment on various systems, to avoid misapprehension, permit me to say that all systems of reformatory treatment are aiming at the same practical results, but proceeding by different avenues of approach. All efforts are for the reformation of character, and the same inaudible voice that moves to reformation endeavour, urges work with every scientific and administrative skill that humans can summon and which is needed so much for the reformation of character and the reconstruction of human life. My thought is this: That the Great Master Mind who has created and inspired human effort for the uplift of our fallen fellows is truly in every process we wield, from the humblest and simplest method to the highest scientific movement of this modern age, and we must be strong enough as men and broad enough in our vision of action to acknowledge every effort made to rehabilitate human life.

It is difficult to understand our modern terms, especially in reviewing the methods or phases of the reconstruction of the criminal from the scientific view-point. To-day, there is altogether too much of a tendency to confound moral will with disease, which movement borders on maudlin sentimentality, and to my mind is dangerous. The moment we consider a man irresponsible for crime we will find it a serious matter to apply restorative or curative methods apart from the treatment of the insane. I have always regarded criminals, individually, as having a degree of moral reliability, and on this ground the state justifies itself in administering curative methods, with the hope that a strong discipline and well-regulated habits of industry and care of physical life will correct the wrong impressions which the criminal has formed concerning right and wrong and his standard of society. We must not for a moment entertain the thought that criminals are an irresponsible creation and require nothing but an asylum treatment. The whole man must be dealt with, for very few prisoners are wholly abandoned to criminal instincts of a criminal life.

DISCIPLINE.

A proper discipline has for its object the adaptation of character to circumstances, a training to self-command and respect, the adjustment of habits to environment, the development of the faculties and an education or culture which fits the individual for the duties of life. Whenever you find discipline eliminated from the home life, parental control ceases to be a virtue, and is followed, generally, by a fearful wreck and the dissector of the family life. Weakness, over-indulgence, severity and cruelty have worked out many criminal instincts in the lives of children. Very seldom has a well-regulated home produced a criminal. The state has then to undertake the instruction and discipline so often neglected in the home, and lessons of this character come hard to the individual in after-life. The duties to be taught by prison discipline are the general duties of life and good citizenship.

The primary object of imprisonment is the protection of society, and there cannot be any other sane or just object. The economical management of

police departments and criminal courts must depend, in a measure, upon the management and treatment given in the penal institutions where we confine our criminals. The police arrest the offender, the court tries him and the trial judge or magistrate sentences him to a term of imprisonment. The expenses of the first two will be measurably affected during the term of imprisonment by the ability of the prison authorities to change the prisoner's character, during the time named, from a law-breaking to a law-abiding citizen. It is not uncommon in our large Canadian cities that an habitual law-breaker is tried and sentenced thirty, forty, or even seventy times (I know a man in one of our city prisons at the present time who is serving his hundred and second term) all at an enormous expense to the country and apparently to no purpose. The time of sentence in many cases is too short to afford an opportunity for the betterment of the prisoner. It would almost seem that none was even expected by the authorities, yet a stated time sentence can scarcely be considered rational, except on the ground that the prisoner will likely be discharged at the end of his sentence a better man or a good citizen. Whether judges or magistrates are able to determine, by their observations of the prisoner during trial, just how long it will take to change the habits of a life-time so as to make the man into a proper citizen, is one of the very vital questions of the day, for certain it is that it is not agreeable to the advanced civilization in which we live, nor is it likely to be long tolerated or permitted by our intelligent and thinking Canadian communities, that habitual and recidivist criminals should be turned loose upon society to continue their life of crime after imprisonment. I have always thought favourably of the Swiss system of treatment of criminals. That is, as far as I can ascertain, no man is discharged from custody without friends or employment, and the prisoner must go to his employment and behave himself or he goes immediately back to prison. The real interests of society and of the criminal cannot be separated. He is part of ourselves, part of our civilization. Conditions that contribute to his well-being will equally aid all of us. No man is made happier by the suffering of another man. True, a surgeon's knife sometimes inflicts great suffering but, because it performs great uses in the service of humanity, it is honoured. All punishment should be inflicted with the idea of use or service, as a benefit to the sufferer and, like the knife, should never pass the line of necessity, because in either case it would be wrong and brutal. Exemplary punishment inflicted as a deterrent should not pass the correctional line to produce the desired effect. Fear is a powerful restraint in this world, but is effective only so far as the operation of the law impresses the public mind with the idea of justice. Unjust punishment creates sympathy for the culprit and destroys the dignity of rule and regulation. I have never known cruelty and brutality to result from a strong and healthy discipline, but they are produced from a lack of this important element in prison administration. Correctional punishment is the only safe and proper example of a just administration. Maudlin sentimentality would do away with all discipline and consequent punishments which follow in a well-regulated institution. Can we conceive of the state of a penal institution where the inmates rule and their conceptions of justice govern the management? When punishments begin with a single deprivation of privilege and an admonition which fails in the effect (if it is certain that the man is sane and his perversity is born of a real stubbornness and a vicious wilfulness) then severity must be added or the man wins out, and the administration and discipline of the institution receives a setback from which it cannot recover. The vital principle necessary to form a good discipline among prisons is the employment—work—hard work at that, work just the same as is done outside, work in which the prisoner can see something grow under his hands and form a perfect article, as the production of his mind and labour. The higher the class of industry the better for the man. I consider that work which will not produce good results is not any better than idleness.

CONCLUSION.

Many persons become criminal because of their dependent natures and habits. They are brought up practically ignorant of the fact that even the things for personal subsistence and use are not free, and that they can only come into the possession of these by earning them. They have been unmindful of the necessity and mercy of work in some capacity or other. Thousands of children live and grow into manhood or womanhood, disobedient to the natural laws for man's industrial, social, and moral welfare, and the provision of the great privilege which is written: "In the sweat of thy face shalt thou eat bread till thou return unto the ground." There are many who study to get food, clothes, and shelter without earning them and without the expenditure of any real toil or brain sweat. It is absolutely necessary for us to have a clear conception of life, and know that the things which we earn produce the right of citizenship. People who have this knowledge generally keep clear of a prison. In these days when fierce struggles exist between the man who has accumulated wealth and the man who has muscle; between the law-abiding and the law-breaking class; between the heated partisans of differing policies of government; one is lead to seek the universal solvent for human ills and trouble, the one element so often sought in the complex issues of life and so seldom found or understood, that will bring to erring humanity—cleanness of life and a proper respect for law and order. Is it not found in the great but simple truth propounded by the Great Master—"Thou shalt love thy neighbour as thyself"? All our estimates of human nature are in proportion to the best or worst specimens of it which we have witnessed. This, then, is the solvent which is needed to raise the feelings of our humanity into an enthusiasm from the precept of love which has been given. An ideal must be set before the eyes of the mind for those who are called upon to obey it, an ideal or type of man which may be noble and good enough to raise the whole race and make the meanest of it sacred with reflected strength, the glory of a true manhood. Did not the Master do this for all mankind? Did the command refer to those who had never seen a human being they could revere? Could any of His followers turn on Him and say "How can we love a creature so criminal and degraded in all his ways?" Of the human race the Master was a member; and to this day is not the best answer to those who blaspheme the human species by saying there is no hope for the criminal, no reformation, no change of conduct or character; yes, the best answer to all such, even when our sense of its degradation is the keenest, is that the Master had a human brain behind His forehead, a human heart beating in His breast, and that nothing more elevating or attractive has ever been found than in His attribute from His wonderful and beautiful life among men. We may rightly have our penological systems, our criminological sciences, but in and through them all, if we are to expect results from our efforts, we must bring the human life in contact with its Author, for in and through Him only is found the vital force of a redeemed and regenerated humanity. The religious force in human nature is, then, one of the greatest factors in the prisoner's redemption, and the vital force which lifts up men must be of a Divine origin to give lasting and beneficial results.

There was once a prisoner towards whom the tenderest feelings of our heart are now drawn, but in the hour of His trial he trod the wine-press alone, despised and rejected of men, who stood staring and looking at Him, houseless, friendless, and scorned by thieves, spat upon by outcasts, outraged in every sanctity of soul and body, the victim of vicious cruelty, tyranny, and malice, beaten, crucified, and dishonoured, He who cried aloud to the children of men for sympathy and affection in His voiceless woe. In that tumultuous throng that closed upon Him there was no one to pity. A few friends may have stood at a

5 GEORGE V, A. 1915

distance, but near at hand there was only the hate of the poor, the loathing of the educated and official classes, before that awful injustice, that fierce blast of passion when He bowed Himself and gave up His life. Over this great tragedy generation upon generation of the best of humanity have shed their tenderest tears, and the instrument of His torture has become the symbol of power and grace. The illustrious Victim and Victor has by His sacrifice consecrated all suffering and sorrow and given a dignity to all prisoners and captives. He is the Chief of that long line of captives whose miseries the world to-day deplores. Other illustrious prisoners like Joseph, Daniel, Jeremiah, Socrates, Paul, Cicero and Chrysostom have all in their day and generation felt the agony and sorrow of a prison cell, and have sometimes had added torture. We sigh over their stories, but would it have been different had we lived in the days of our fathers? I think not. Are there no prisoners who suffer now? Are there not people in your community who have never heard a kind word or felt human sympathy in their distress? Have we not in our penitentiaries to-day nearly two thousand man and women from whom society shuns and shrinks as from a pestilence? And so little is done to reconstruct their wasted lives and welcome them back to human society on their release. I am afraid we stand in the light of this wonderful command, "Love thy neighbour as thyself," condemned, yes, as thoroughly condemned as those who were swift to shed the innocent blood of the Christ.

Respectfully submitted,

W. P. ARCHIBALD,
Dominion Parole Officer.

APPENDIX B.

WARDENS' REPORTS.

KINGSTON.

KINGSTON, ONT., July 4, 1914.

Inspectors of Penitentiaries,
Ottawa.

SIRS,—I have the honour to submit my annual report, together with crime statistics and other reports, in connection with this penitentiary, for the year ended March 31, 1914:—

There were in custody March 31, 1913.....	516
Received during the year.....	199
	<hr/>
	715
Discharged:—	
By expiration of sentence.....	64
By parole.....	114
By deportation.....	15
By death.....	8
By removal to reformatory.....	1
By return to provincial authorities.....	2
	<hr/>
	204
Remaining March 31, 1914.....	<hr/>
	511

The daily average for the year was 499.

In October we sustained loss by fire in the laundry and change room, and a full report of the circumstances connected with the matter was made to you at the time. The greatest loss was the damage to the roof of the building, which was repaired and is again occupied.

The masons were employed during the summer at building the new boundary wall, and during the winter in making cement blocks to be used in the reconstruction of the north wing.

The stone cutters were busy getting the stone ready for the wall and towers, also cutting jambs, etc., for the north wing.

The blacksmiths made new barriers and wove wire beds for the hospital, which have been placed in position, improving the cells very much; also barriers for the keeper's hall, four cage barriers for the isolated ward, and 140 barriers and ninety-six beds for the Saskatchewan penitentiary, and 152 barriers and 152 beds for Alberta penitentiary. Iron grates and transoms, grills, and locking bars for Manitoba penitentiary.

The carpenters were employed at the new Roman Catholic chapel, keepers' hall, new cold storage plant for kitchen, new roof in change room building, and the usual repairs.

The tailors and shoemakers made clothing and shoes for the Indians in the North-west, officers' uniforms, and convict clothing.

The tinsmiths and painters were employed on the change-room roof, making tinware for the kitchen, general repairs, and weaving wire beds.

The quarry gang got out the stone for the various works, including the stone-breakers.

5 GEORGE V, A. 1915

There are at present forty-nine inmates, classed as insane, and the building called the insane ward cannot accommodate all of them. I would recommend to your consideration the removal of all the insane to a separate institution.

Nine female prisoners were recently transferred from Alberta penitentiary, making our present total nineteen. It is interesting to note that these are all the female prisoners west of the Maritime Provinces. They are confined in a separate building inside the boundary wall, but while the building is new and suitable the ground space is limited.

Respectfully submitted,

A. G. IRVINE,
Warden.

SESSIONAL PAPER No. 34

ST. VINCENT DE PAUL.

ST. VINCENT DE PAUL, April 1, 1914.

SIRS,—I have the honour to submit my third annual report, together with crime statistics and other reports in connection with this penitentiary for the year ending the 31st March, 1914.

Remaining convicts at midnight, 31st March, 1913 was.	405	
Received during the year from common jails.....	180	
“ “ forfeiture of license....	6	
“ “ licenses revoked.....	8	
		599
Discharged by expiration of sentence.....	92	
“ parole.....	83	
“ deportation.....	9	
“ pardon.....	2	
“ death.....	4	
“ transfer to Kingston.....	6	
“ court order.....	2	
		198
Remaining at midnight, 31st March, 1914.....	401	

The conduct of the convicts has been very good. No serious breach of discipline has occurred, and we had no escape, neither attempt of escape.

The undermentioned work done during the year, namely:—

New North Wing.—The reconstruction of this dormitory was completed and occupied in January last. The work of reconstruction involved the removal of the interior construction, the excavation in rock for water pipes, sewers, steam pipes, and the building of a new cell block on a modern line.

Concrete Culvert.—A concrete culvert 80 feet in length was constructed during the summer. The difficulty arising from the rapid water flow in the creek during the course of construction made the work arduous; this, however, was remedied by the construction of a temporary drain. Teams were occupied during the fall and winter carting stones and earth to extend the embankments. When the filling-in is accomplished and the trestle removed we will have then a direct road on our own property to the root cellar and barns, thus eliminating the necessity to use the village streets.

Ornamental Grounds.—The unsightly appearance of the front reserve has been greatly improved during the summer. A gang was employed excavating and grading. Fully 10,000 loads of stones and earth were carted to level up, and the portion of the terrace was sodded. The approach to the institution presents a tidy and ornamental front to our building.

Farm Drain.—A stone drain 400 feet in length was laid in St. Francois road to drain the farm; this drain connects with the creek on the reserve.

Piggery Building.—A gang of masons was engaged for about two months during the summer repairing the brick walls of this building, and the roof was also repaired and painted.

New Hospital.—This work was pushed along during the year, and I venture to hope will be completed and ready for occupation this summer.

5 GEORGE V, A. 1915

We had the misfortune on the 26th February last of having a fire, which broke out in the store oil-room and which caused very considerable damage. The store, north lodge, and Roman Catholic chapel were totally destroyed, but I desire to remark that the improvement which will be caused by the demolition of the Roman Catholic chapel, originally built in such a position that it obstructed a large portion of the yard will in a great measure compensate for the loss. In fact, the removal of the Roman Catholic chapel alone in creating a new and improved aspect in the yard mostly covers this loss. As a matter of fact, new plans would evidently have had to be drawn up for the remodelling of the front portion of the penitentiary, the oldest part of the prison, and the fire has hastened the matter forward.

Temporary Cell Block.—The entire block of cells was removed and the room converted into a temporary Roman Catholic chapel, with a sitting capacity for one hundred and ninety-two men; as this number is about one-half of the Roman Catholic congregation, two services are held every Sunday and holiday. This will be continued until the new chapel is built.

In finishing my report, I beg to say, as a rule, I wish to thank my officers for their hearty support during the year.

Respectfully submitted,

G. S. MALEPART,
Warden.

SESSIONAL PAPER No. 34

DORCHESTER

Dorchester, N.B., May 4, 1914

SIRS,—I have the honour to present the statistical and other reports of the Dorchester penitentiary for the fiscal year ended March 31, 1914.

During the year the prison population has increased. On March 31, 1914, the total was 231 against 195 on March 31, 1913, showing thirty-six of an increase.

I have to report the removal by death during the year of our surgeon, the late Dr. D. D. McDonald, of whom it can be said "a good man has fallen." Near the end of the fiscal year the Roman Catholic chaplain, Rev. A. D. Cormier, resigned, his position here on account of failing health, after a long and faithful service. His optimistic presence will be much missed by the entire staff.

The discipline has been good, and the officers faithful in the discharge of their duties, and to them I beg to extend my thanks for the zeal and faithfulness manifested.

In conclusion, I again desire to express my sincere thanks to yourselves for the courtesy extended to me.

Respectfully submitted,

A. B. PIPES,
Warden.

MANITOBA.

STONY MOUNTAIN, April 1, 1914.

SIRS,—I have the honour to submit the annual report of this penitentiary for the fiscal year ended March 31, 1914, together with reports from the various departments, including the surgeon, chaplains, school instructor, farm instructor, and the crime statistics.

From the statistics it will be seen that the convict population decreased twenty-eight during the year, the figures being as follows:—

Remaining on register, March 31, 1913.....	200
“ “ March 31, 1914.....	172
	<hr/>
	28

The convicts were all employed advantageously during the year, and for the most part in the open air.

The work done during the year included the following:—

Considerable progress was made in the construction of the road from here to Winnipeg. During the seasonable weather we had from five to eight teams working daily on the road, ditching, grading, repairing, and hauling gravel and broken stone. We delivered on the road during the year, 1,845 yards of broken stone and gravel, and completed a mile and a half of standard macadamized road, which has been inspected by the Manitoba Government Roads Commissioner, Mr. McGillivray, and declared to be as good, or the best, in the province.

Practically all of the broken stone, and all the gravel was supplied by the prison, the exact amounts being as follows:—

Stone broken by convicts at the prison.....	1,164 yards.
Gravel taken from prison gravel pit.....	609 “
Crushed rock taken from city quarry.....	72 “
	<hr/>
Making the total supplied to the road.....	1,845 “

In reply to an advertisement of the municipality of Rosser, the lowest price they received for broken stone or gravel, delivered on the road, was \$2.50 per yard, therefore the contribution of 1,845 yards made by this institution, at \$2.50 per yard, would amount to \$4,612.50, as well as a large amount of repairs we made on the roads in the early spring after the thaws.

In placing the gravel on the road we commenced at a distance of 6 miles south of the gravel pit, and are working our way back to the penitentiary. We have done repairs on this road at as great a distance as 10 miles from the institution.

The brickyard was operated for part of the season, and 340,000 bricks were manufactured, which will be used in the erection of the new stables and east wing.

The concrete boundary wall was completed, and the cement coping, which is a very heavy one, placed on the south wall, leaving only the east wall to be plastered and the coping to be put on. The new entrance gate and office building will be completed in about two weeks.

SESSIONAL PAPER No. 34

Some 23,584 square feet of cement plastering were put on the south boundary wall, and 10,456 square feet on the entrance gate and office building; 850 yards of plaster were put on the interior of the offices in the gate entrance building.

A new bastion tower, including masonry, was built on the northeast corner of the wall.

The sewer was extended about 200 feet to the offices at the new entrance; this sewer is 8 feet deep through solid rock.

The engineer's, blacksmith's, and tinsmith's departments were removed from the small temporary buildings in the enclosure to the new shops, and the necessary machinery installed.

We have commenced to instal the wiring and conduits for the electric lighting of the institution. This work will be carried to a hasty conclusion, consistent with security and good workmanship.

Repairs were made to the roof of the warden's residence, and the usual amount of repairs to the officers' quarters.

The products of the farm during the year consisted of 4,500 bushels oats, 750 bushels barley, and 3,000 bushels potatoes, as well as turnips and other small vegetables sufficient for the supply of the institution.

The operations on the farm were not as successful as I would have liked to have seen, owing to the fact that the farm was overrun with sow thistles, and, on account of which, we had to summer-fallow 100 acres.

During the winter we cut and stored 77 tons of ice, which is considered sufficient for the requirements of the institution for the coming summer. The ice was procured from Poplar Springs, which is situated 5 miles from the penitentiary.

The general health of the convicts during the year, as shown by the surgeon's report, was good. There were two deaths, and two accidents of a minor nature.

The conduct of the prisoners has been good throughout the year, the offences and violations of the prison regulations being confined to a very small number.

We had two attempted, and five escapes during the year, four of these being recaptured, one man having made a clean getaway. In this connection I wish to draw your attention to the difference in the penalties meted out to prisoners who escape from this penitentiary and those who escape from a common jail.

It has been the practice for the last twenty one years to take convicts who escape, or attempt to escape, from this penitentiary before the King's Bench Court at Winnipeg, whose sympathies or inclinations do not seem to be in the direction of assisting to maintain discipline.

I below give a comparative list of the last twelve convicts taken from here to the King's Bench Court for trial for escaping, or attempting to escape, from the penitentiary, and the last twelve prisoners received from other courts, who were sentenced for escape or attempting to escape from jails:—

Penitentiary (all tried at Winnipeg)—

1637	Bonnar.....	12 months.
744	Fraser.....	12 "
1657	Copeland.....	6 "
1529	Gilboy.....	6 "
1523	Acton.....	6 "
1672	Foster.....	(Suspended sentence) 6 "
929	Wright.....	4 "
1136	Williams.....	4 "
1136	Stephens.....	3 "
1227	von Vellen.....	3 "
1157	Bloszszak.....	2 "

5 GEORGE V, A. 1915

From jails—			Tried at:
873	Hamelin.....	36 months	Edmonton.
1789	Newby.....	24 "	Kelowna.
1780	Murphy.....	24 "	Fort William.
1722	McCullough.....	24 "	Portage la Prairie.
1604	McMillan.....	24 "	Rainy River.
1601	Ryan.....	24 "	"
1602	Hassard.....	24 "	"
1527	Nikel.....	24 "	Morden.
1257	Peterson.....	24 "	Portage la Prairie.
1075	Theriault.....	24 "	Prince Albert.
866	Coe.....	24 "	Lethbridge.
1123	Minner.....	12 "	"
		288	"

From the above comparisons you will easily understand that a convict having only a few months to do does not hesitate to take a chance at escape, as he feels that his punishment, should he be caught, would be very light, and, as some convicts have said, it was only an even break.

A number of the convicts taken to Winnipeg for trial pleaded not guilty for the purpose of making a lot of lying statements in an endeavour to work on the sympathy of the jury and the public. These statements, being taken down by the newspaper reporters, are scattered broadcast as facts, and such statements usually reflect discredit on the management of the institution and hold it up to public scorn, whereas, if the law was amended and we were permitted to take a convict before a police magistrate, a great deal of this kind of nonsense would be stopped, and a more adequate punishment meted out.

I wish to thank all the officers for their fidelity and hearty support; also Chief Macpherson and Deputy Chief Newton, of the Winnipeg police force, for their kindness and services at all times when required, and, in conclusion, to express my deep gratitude to yourselves for the various courtesies and assistance extended to me during the year.

I have the honour to be, sirs,

Your obedient servant,

J. C. PONSFORD,
Warden.

SESSIONAL PAPER No. 34

BRITISH COLUMBIA.

NEW WESTMINSTER, B.C., April 11, 1914.

SIRS.—I have the honour to present herewith the statistical and other reports of the British Columbia penitentiary for the year ended March 31, 1914.

The year is notable as witnessing a visit of inspection to the penitentiary (only the second, I believe, in the thirty-six years of its history) by the head of the service—the Minister of Justice. The officers were glad of the opportunity to bring certain points to his attention, and the fact that the minister has the personal knowledge of local conditions which his visit would give him, is a source of satisfaction to those who serve under him in this outlying section of his department.

The prison population when the year closed was greater by twenty-five than when it began; and the increase in daily average population over last year was twenty-four.

The year has been as free from unpleasant incident as any year in the history of a penitentiary could well be. There has been no death, no serious accident, no escape, and (except that one man was detected in a futile attempt to dig through a wall) not even an attempt to escape.

We have among the prisoners eight or nine idle talkative fellows, and these, with others whose craving for tobacco leads them to break rules in their efforts to obtain it, are responsible for a very large percentage of the offences and punishments reported. The majority of the prisoners have behaved well and worked with fair industry. Of 376 in custody at the close of the year, 190 had "clean sheets"—no breach or rules had been recorded against them—and sixty-nine had only one such report.

A point to which attention may be drawn is the recent introduction of a new element in our prison population. The year 1910-11 saw the reception of our first Hindu prisoner; the close of 1913-14 finds eight of these people in custody.

The increase in the pay of the officers has, among other good results, given a more permanent character to the prison staff. Formerly the position of guard was often sought merely as a temporary expedient until something better could be secured, and of course the interests of the prison suffered; but since the increase in pay came into effect, officers feel that the position is, in emolument and other conditions, quite equal to any of the positions which formerly induced men to leave the service. Therefore it is easier to get and to keep properly qualified men. Resignations are less frequent. Taking the staff as a whole, I have reason to be very well satisfied with the loyalty to the service and the general harmony and absence of complaint which marks the everyday discharge of duty. With support and assistance given me by the superior officers, I am more than satisfied.

Work has, of course, gone on steadily during the year. All the usual industries have been in operation, progress has been made in the work of improving the grounds through which the public approach to the prison lies, and the construction of the new cell block has been pushed on as rapidly as possible. We hope that another year will see it almost, if not quite, ready for occupation.

The chaplains continue to make the future of discharged convicts a matter of deep concern, and the Salvation Army officers are, as always, ready to do what they can in aid of any deserving case, irrespective of creed or colour. All have, during the year, been cheered by reports of the steady continuance in honest work and decent living of some who have been under their care.

I have the honour to be,

Your obedient servant,

JOHN C. BROWN.

Warden.

SASKATCHEWAN.

PRINCE ALBERT, SASK, March 31, 1914.

GENTLEMEN,—I have the honour to submit the annual report, together with crime statistics and other reports in connection with this penitentiary, for the year ended March 31, 1914.

Remaining at midnight, March 31, 1913.....	95	
Received since:—		
From common jails.....	65	
Forfeiture of license.....	1	
Total.....	161	161
Discharged since:—		
By expiration of sentence.....	8	
By parole.....	8	
By deportation.....	4	
By order of the court.....	1	
Transferred to Alberta penitentiary (females).....	5	
Total.....	53	53
Remaining on hand March 31, 1914.....		108

This shows an increase in our population of thirteen (13).

As you are aware, Inspector Hughes was in charge of this penitentiary from the middle of May until the middle of September. In this connection I desire to draw attention to the large amount of work which was done, and was put under way by him.

Some one hundred and fifty (150) acres of our farm was cleared, broken, and is ready to seed this year.

Some eighteen (18) sloughs were drained and a number of acres of the best of land were reclaimed. A new granary, 50 feet by 30 feet, with concrete foundation and floors, six cross-walls all of brick, forming the bins, was built; also, a new brick pump-house was built.

The deputy warden's house was also under way and was completed this winter; it is now occupied by myself.

Two large wells were sunk within the enclosure, and our pump brought in from the outside and connection was made with the wells.

The walls of the extension on to the present temporary cell wing are about half way up; this work was started last fall, and it is expected to have the brick work completed by the end of May.

The trench for the foundation of the new permanent cell wing was dug during the first part of the winter, and we started driving piles the last week in March.

During the month of January we hauled enough sand, from our sand pits across the river, for all building purposes during the coming summer.

During the month of February we started cutting piles, fence posts, and dry wood on our timber reserve across the river, and I am pleased to be able to report that we cut and hauled over four hundred (400) 18-foot piles, 1,500 fence posts, and a considerable quantity of dry tamarack for use in burning brick. We were

5 GEORGE V, A. 1915

only able to do about one month's work in the woods owing to the very mild weather during the first part of March.

Our brick industry has turned out 700,000 bricks of good quality. We have over three hundred (300) cords of wood, all cut off the prison farm, which was sawed into cord wood lengths during the winter, ready for burning brick this summer.

I regret to have to say that two convicts escaped into the woods off the reserve, but were recaptured in a very short time by the officer in whose charge they were.

I wish to thank the officers for the support they have given me; they have diligently and faithfully performed the duties assigned them.

I have the honour to be, gentlemen,

Your obedient servant,

W. J. MACLEOD,

Warden.

APPENDIX C.

SURGEONS' REPORTS.

KINGSTON.

To the Warden,—

SIR,—I herewith submit my annual report of the medical department of the Kingston penitentiary for the year ending March 31, 1914.

It is extremely gratifying to be able to report that the sanitary condition of the institution has been maintained, as in former years, in a most satisfactory condition during the year just past. Foul sanitary conditions do not, and could not, exist; otherwise we would have unfavourable results due to them, such as epidemics of contagious diseases. There is no record of any disease due to bad sanitation; indeed the sanitary record of the Kingston penitentiary is unimpeachable. Go where you may, cleanliness as a rule prevails, and cleanliness is not only "next to godliness," but is sanitation, pure and simple. However, in conjunction with this strict cleanliness which is constantly supervised by those in charge, a liberal supply of disinfectant material is daily utilized to reinforce the work of absolute cleanliness and sanitation. The closets and bath-rooms have been regularly inspected, and it has been quite the exception to find anything in connection with them to remedy, cold water has been always available, and no unpleasant odours can be discovered.

The ventilation in the sleeping apartments, workshops and other buildings on the prison premises has been all that could be desired for maintaining the good health of the prisoners. The sewage works have been operated with much care, and the sewers are flushed out at regular intervals so as to prevent the accumulation of disagreeable odours and the dissemination of any disease-producing germs which might find their abode in these localities. The filtering beds have been always found in a satisfactory condition and the ground surrounding them has been kept in good order.

The food has been of good quality, cooked with a relish, and served in abundance. On my frequent visitations to the kitchen during the year it always appeared to me to be perfectly clean, and the cooking utensils were bright and well kept. Vegetables, when available, are supplied the prisoners in liberal quantities, thus adding to the relish of the mid-day meal. The luxury of prison fare has indeed many attractions for a certain class of prisoners, especially that class whose methods of existence or of earning a livelihood are most uncertain. Nevertheless, the food question is a constant grievance with many prisoners of the habitual class particularly. This class is always implacable; they want hotel fare, no work, and to be immune to disciplinary regulations. The fact, however, that a number of prisoners return from time to time to prison, is a fair evidence that the life in the penal institution is not attended with so much misery as usually depicted by literary ex-prisoners, by those in custody, and others. The misery from which a certain class of prisoners suffer is due altogether to their own temperament and their evil thoughts.

The water supply for drinking purposes is abundant, and repeated examinations of it during the year by me failed to disclose the presence of any organic or other materials likely to affect its purity. The water is available for drinking in all parts of the prison.

The heating of the prison has been satisfactory, and comfort in that regard has usually prevailed during the cold season. This has been particularly in evidence in the hospital department, where the new method of distributing the

5 GEORGE V, A. 1915

heat has given unprecedented results as regards comfort. The hospital, as in former years, has been kept immaculate as regards cleanliness and sanitation. The Minister of Justice, when on a visit to this department, expressed his extreme satisfaction with the methods of its management, the absolute cleanliness of its cells and corridors, and the care and attention given the patients. It would be, indeed, difficult to find anywhere a ward in any public hospital maintained in such a spotless condition, due regard, of course, being given to the character of the patients and their absolute custody. Trained and selected orderlies are in constant attendance, night and day, to wait upon those who are ill; the orderlies being directed in their duties by the overseer. Every patient receives the best of care, and it is doubtful if patients in general hospitals receive the amount of care and attention accorded those in the prison hospital, due allowance being made for the criminal class who are always difficult to manage as well as to treat, and who, possessing imaginary grievances, are at enmity with society, and therefore do not possess that cheerful disposition which is an important aid in effecting a speedy restoration to health. Daily sponge baths are usually administered to those confined to bed, when necessary, and where patients are sufficiently strong to bathe in the regular bath tub, they are permitted to do so under guardianship of the disciplinary officer in charge. With few exceptions, the sick are always grateful for the attention accorded them; and many of them when discharged from prison have repeatedly written to the surgeon and others, expressing their grateful thanks for the attention and care bestowed upon them in the prison hospital during their illness. These letters of approval and commendation have been received from time to time from ex-prisoners, and have been most gratifying to the management.

The adjustment of spectacles for those prisoners requiring them is no small problem, but in this matter the method by numbers is usually pursued, and as a rule, unless in special cases of astigmatism and other severe ocular abnormalities where the services of a specialist are evoked, is convenient if not always satisfactory. Many prisoners, as the result of observing others with spectacles, become suddenly under the impression that they also require the services of an optician; this may be accounted for by the fact that their range of vision become somewhat abbreviated within the confines of the prison wall until they become accustomed to their new surroundings and the range of their visual axis.

Every prisoner is vaccinated as soon as possible, and at the time of writing this report, every prisoner has a mark as the result of vaccination. This is carefully noted, as well as any other defect such as rupture when a truss is at once adjusted if possible. As all prisoners come charged with a medical certificate that they are not suffering from any contagious disease, it is of course rare to find one with any evidence externally of any disease which might be communicated to others, and there has never been any evidence of any infection from one prisoner to another; this would be impossible under the circumstances and directions. It is doubtful if it could occur in any case unless absolute contact. Every prisoner is given a careful examination as to his mental condition, and the facts noted. A recommendation is then made according to the result of the examination, and the prisoner is disposed of to a department best suited to his condition.

The general health of the prisoners has been as good as in former years, and there have been no contagious diseases. Several important surgical operations have been performed by me, and they have been most successful, the patients returning to work again in good health.

The number of deaths for the year may be regarded as small in view of the fact that so many broken-down prisoners, both physically and mentally, come to prison. There were only eight deaths recorded during the year, some of them being from the chronic insane type. The number treated in the hospital has been on a par with that of former years.

SESSIONAL PAPER No. 34

There were ninety-two cases of sickness amongst the officers during the year, this number being somewhat less than in former years. The officers receive my best attention at their homes, both day and night, as required. Some of them have suffered from long and severe illness. They are, as a rule, most anxious to return to duty as soon as possible, and are invariably thankful for the attention given them.

Insane Ward.—There were forty-one in this ward at the end of the fiscal year. The admissions to, and the discharges from, this ward have been a little over those of former years. The health of the inmates has been, as a rule, good. This department has been looked after carefully by those in charge, and has been kept in a sanitary condition. The bath-rooms have been renovated during the year, and ample facilities for bathing are afforded. Each inmate receives his weekly bath, and if he refuses through a contumacious attitude to comply with directions, he is compelled to take it for sanitary reasons. The insane are inclined to be careless about their person, and if not given their ablutions regularly, there would be danger of unpleasant odours, and perhaps disease. It may be remarked that the inmates of this ward are as carefully looked after as are the inmates in any ward of a regular asylum where a dangerous class of inmates are in custody. Despite the accounts of reputed cures in the asylums of the country, the asylums are at all times filled to overflowing with all kinds of incurables, numbering up in the thousands. An occasional one does perhaps recover, but suffers from permanent mental derangement afterwards; they recover but are not cured. Thus it is, as has been remarked by a writer, that, "the criminal has not been reformed nor the insane cured to the extent recorded in statistics."

Female Ward.—The inmates enjoyed good health in their new quarters, and there was very little sickness, with the exception of the "grippe." There were ten inmates in the ward at the end of the fiscal year.

Isolation Ward.—This ward is kept bright and cheery, and the incorrigible classes which are kept there appear to enjoy good health. There were eleven prisoners in the ward at the end of the fiscal year. There is no reason to believe that separate confinement has a tendency to induce a state of morbid introspection, or that it has a bad effect; indeed, experience proves that the quietude of the ward has a soothing effect on the nerves of a certain class of incorrigibles, and it is therefore difficult to imagine why this ward, which was erected for this class, had been kept closed so long. The re-opening of it has marked a new era in prison management.

The usual returns of the hospital overseers are transmitted herewith.

DANIEL PHELAN,
Surgeon.

H. W. WILSON.

5 GEORGE V, A. 1915

ST. VINCENT DE PAUL.

ST. VINCENT DE PAUL PENITENTIARY, May 7, 1914

SIR,—I have the honour of submitting to you my report for the fiscal year ending the 31st March, 1914. I state with pleasure that no accident happened this year, in spite of the extra work done by the convicts in demolishing the buildings attacked by the fire which grieved us so much.

I thank you, for the zeal and kindness you have shown in putting at my disposal large cells to which we removed my patients while the fire was ravaging our hospital.

The health of the convicts, in general, has been satisfactory. Four convicts died; one died from a cancer of the stomach, one from general paralysis and two others from typhoid fever.

In reference to these two deaths, I would suggest that a large filter be installed, because I fear that our intake of water from Rivière des Prairies is contaminated by the drains of the north part of the city of Montreal and of Bordeaux jail.

Three convicts were transferred to Kingston hospital, being insane.

I have given nine thousand one hundred and forty one consultations, say, a decrease of near two thousand on the preceding year, also one hundred and thirty-two convicts were treated at the hospital.

In conclusion, I beg to thank especially the hospital assistant, also all the staff of this institution for the courtesy they have always shown me in the performance of my duties.

Yours faithfully,

J. A. POMINVILLE, M.D.

Surgeon.

DORCHESTER.

DORCHESTER, N.B., April 25, 1914.

SIR:—I have the honour to submit my report for the three months ending March 31, 1914. The general health of the convicts has been excellent, though there have been some cases of inflammatory rheumatism and tonsilitis of severe types. The records show two deaths during the year. The sanitary condition of this penitentiary is good.

J. F. TEED, M.D.,

G. B. PAPINEAU,

Health Officer.

5 GEORGE V, A. 1915

MANITOBA.

STONY MOUNTAIN, April 1, 1914.

SIR,—I have the honour to submit report of the medical department of Manitoba penitentiary for the fiscal year ended March 31, 1914.

Excepting a comparatively few cases, the health of the convicts has been good during the past year. There have been no epidemics or infectious diseases, and no serious accidents except a sprained ankle and a case of fractured ribs, both of which made a good recovery.

I regret to report two deaths: one (McCulloch) dying of tuberculosis, and the other (King) dying after amputation of thigh necessitated by failure of union in a spontaneous fracture of the femur.

The health of the officers has been good, only eighty-seven days being lost through illness by the entire staff.

Statements of cases treated at dispensary and in hospital are appended.

Respectfully submitted.

J. A. McGUIRE, M.D.,
Surgeon.

ALBERTA.

EDMONTON, ALBERTA., March 31, 1914.

SIR,—I have the honour to submit my annual report as surgeon of this penitentiary for the year ending March 31, 1914.

The health of the convicts and officers has been better than any previous year, considering the increase in population.

There was one case of diphtheria during the year, which is all the infectious disease I have to report.

There were no deaths in the prison during the year.

The following table will show the number of cases treated in the hospital and dispensary during the year.

I have the honour to be, sir,
Your obedient servant,

ALEX. FORIN,
Surgeon.

SASKATCHEWAN.

PRINCE ALBERT, SASK., March 31, 1914.

SIR,—I have the honour to submit my annual report as surgeon to the Saskatchewan penitentiary, for the year ending March 31st, 1914.

The health of the convicts generally has been good, there not having occurred any serious cases of sickness.

There have been several minor accidents, such as puncture of feet on nails, incised feet and toes, and one major accident, the latter making necessary the amputation of a left arm about four inches below the elbow.

The health of the officers also has been good with one exception, a case of typhoid fever, with good recovery.

The food served to the convicts has been good in both quantity and quality, and has been very well cooked.

Respectfully submitted,

J. S. CHISHOLM,
Surgeon.

APPENDIX D.

CHAPLAINS' REPORTS.

KINGSTON.

PORTSMOUTH, April 6, 1914.

To the Warden,—

SIR,—I have much pleasure in presenting this my fifteenth annual report as Catholic chaplain at the Kingston penitentiary.

Undivided attention has been given to the performance of the duties devolving upon me among such a heterogenous congregation as is met with in this institution. The chaplain's position has for its object the meeting with individuals who, through unfortunate circumstances, everyday mistakes or evil habits have become "Ishamaels" in society, and through constant vigilance and repeated admonitions endeavour to remove the stumbling blocks of by-gone days, and launch them once more on the ocean of life as law-abiding citizens for the rest of their lives.

Much importance is attached to the ceremonies of Catholic worship, the beneficent influence of which is seen everywhere, but nowhere more manifestly than in a prison chapel. The vestments of the officiating priest, the decoration of the altar, the glare of the lights, the peals of the organ, the Church's beautiful chant, all tend to impart to our grand ritual a solemnity which touches, as a rule, the hardest hearts, and leads them to amendment. It is consequently all important that every attention should be given to the beautification of the chapel, and thus help to make the inmates forget there at least, that they are still in prison.

Another great agent that helps not a little in the betterment of men is the prison library. Every man who leaves prison precincts behind him should go forth armed with a better equipment for earning his living, better standards of conduct, and greater confidence in his ability to make good. Almost every day, we perceive men leaving our penitentiary gates with the prison label still upon them, for the new clothes taken from the shelves of the outfitting room are recognized immediately by both the policeman and the saloon-keeper. It is more often the rule than the exception, that, untrained and uncontrolled, the discharged ones entered prison smarting at the hard luck or the spite which had put them behind the bars. Detaining them for a few years makes little difference if they go away with the same standards of conduct and the same ignorance. Hence the prison library should not be any longer the dumping ground of literary rubbish, cheap in tone as well as in price. If the language is vulgar the characters of the books suggestive, the prison is providing bad company and poor ideals for the parties who are sent here for reformation. It is surprising that detective stories figure more or less in the fiction list of our institutions, a *very dubious* policy indeed, for such books furnish stories of crime, which suggest ingenious plans, and point out the weak spots in the method of their execution.

It is therefore more than gratifying to know that you have given this question close study and serious reflection since your appointment as warden of this institution, and that ere long we hope to see our general and chapel libraries thoroughly purged of unsuitable matter, and the shelves replenished with works of history, biography, and travel, written by standard authors in

5 GEORGE V, A. 1915

the English, French, and Italian languages, to meet local wants and supply good mental food for our prison population taken out of normal human intercourse and shut away with their thoughts for several years.

Before closing this report, I desire especially to acknowledge with sincere gratitude your uniform kindness and courtesy in my intercourse with you throughout the past year and to offer, moreover, to the officers generally, my thanks for the services they were ready to lend me when occasion required same.

I remain, Sir, yours respectfully,

M. McDONALD,
Roman Catholic Chaplain.

KINGSTON, March 31, 1914.

SIR,—I have the honour of herewith submitting my first annual report as Protestant chaplain, and I desire, at the outset, to express my sincere appreciation of your kindness and consideration, and also of the courtesy shown me by the members of the staff.

Religious services have been regularly conducted on Sundays and holy days, and the conduct of the men has been, on the whole, excellent. Of course in such a gathering one need not look for a manifestation of interest on the part of all, but of the great bulk of the men I have no complaint to make. On the other hand, I have been particularly encouraged by the large number of those with whom I have conversed from time to time who seem to have profited by their troubles, and to be sincerely striving to live Christian lives under difficult and trying circumstances. It appears to me that the "indeterminate sentence" would be a splendid thing in the case of many such men, and that if these could be allowed out after a short prison term, a far more lasting impression would be left upon their minds.

Our choir has rendered excellent service throughout the year, and their singing and responding have added a heartiness and impressiveness to the services which many visitors have remarked upon.

We have been favoured with addresses by a number of ministers of the various denominations in the city; by several of the professors of the university; as well as by some missionaries and other visitors to the city. The bishops of Ontario and Kingston have also most kindly given addresses which have been much appreciated. In our monthly "service of song" we have been greatly assisted through the kind help of many of our musical friends from the city.

I have been conducting Bible classes for the men bi-weekly, and for the women once a month. For the latter a Bible class has also been held on Saturdays, under the leadership of Miss van Straubenzie, or one of the ladies of the W.C.T.U., and their kindness in this respect has been much appreciated by the women.

The Salvation Army officers continue to give valuable practical assistance to men leaving the prison.

Three times a week in the vestry of the chapel I have been present to receive and talk with the new arrivals and any others who might desire to consult me, and this opportunity, I am glad to say, has been taken advantage of by a large number of men.

SESSIONAL PAPER No. 34

I have regularly visited the sick in the hospital, and also the men in the isolation prison. I have not been altogether satisfied in my mind with the work I seem able to do in the asylum, and I trust some way may yet be found whereby I may be able to do something more for these unfortunates.

I have visited all the men in their cells at night, and have begun a second visitation of the kind, as such calls seem to be appreciated by a large proportion of the men.

Respectfully submitted,

O. G. DOBBS,
Archdeacon of Kingston, Protestant Chaplain.

ST. VINCENT DE PAUL.

SIR,—I herewith have the honour of submitting my report of the fiscal year ending 31st March, 1914, being my nineteenth annual report as Protestant chaplain of this institution.

Beyond the disastrous fire of the 26th February, which will doubtless be fully reported elsewhere, there has been little out of the usual routine during the year. One of my flock died after a long illness. The library has been increased by a large number of valuable books, and will therefore be a greater boon to the men, by not only relieving the tedium of their hours of enforced idleness, but also by enabling them to improve their minds. The behaviour of the men in chapel has been good, and a large proportion of them join heartily in the services.

Movement during the year—

Convicts remaining March 31, 1913.....	69

Thanking you, sir, and the officers of the staff generally, for the courteous assistance accorded me in the performance of my duties.

I beg to remain, with all respect,
Yours faithfully,

JOHN ROLLIT,
Chaplain.

SESSIONAL PAPER No. 34

ST. VINCENT DE PAUL, April 1, 1914.

SIR,—The end of this second year of my minstry in this institution was marked by an event, I should say rather a catastrophe, which it is not easy to forget in presenting you this second annual report.

Our splendid chapel is a thing of the past, and the magnificent organization of divine worship which with your kind and zealous assistance we had tried to inaugurate and keep up in this chapel has been reduced through this disastrous fire to the state of the humblest and poorest mission.

Whilst on this subject, I cannot but mention with gratitude the sincere sympathy and practical devotedness which the officers and all the staff of the institution have shown to us, as well as the generous help of the citizens who kept in their houses and returned so faithfully what had been saved from the fire.

It is thanks to you, Sir, and to the rapidity with which the temporary chapel was opened and furnished that we were not deprived of a single service nor prevented from fulfilling with fidelity the precept of the Lord's Day.

And what edification in the respectful behaviour and silent recollection of the congregation. It is a remarkable fact and admitted by all. The Reverend Father Marsolais, the parish priest, by giving us a beautiful altar for our temporary chapel rendered us a signal service, which I am pleased to acknowledge here.

Finally, the Reverend Sisters of Providence, to whose lot it fell to restore the sacristy upset by the rescuers deserve great credit for their work on this occasion.

And now we are waiting for the erection of a new chapel. It will be more beautiful, vaster and still better furnished than the old one. Such is the promise made to us by Mr. W. S. Hughes, inspector of penitentiaries, and I must say here how grateful I am to him for his friendliness under these trying circumstances, as well as for the freedom he allowed the chaplain in determining the plans of the new sanctuary and sacristy. It seems that the organization of the library was very satisfactory this year. More than a hundred new volumes as well as several subscriptions to monthly reviews have been added to our literary collection. However, I do not believe that the care of the library together with the teaching of the convicts can produce the desired results unless a special position be created and confined to an officer who would perform the functions of both librarian and teacher.

This officer, who should be the possessor of certificates for the teaching of both languages, would have the exclusive charge of the school and the library. The classification and care of the books remaining as to choice and moral control under the supervision of the chaplains and the distribution of these books would be made with every guarantee of impartiality for the men and with a view to the particular needs of each individual.

Three of our men died this year. Their preparation for this terrible passage, their dispositions of mind and heart, as well as the revival of the christian spirit in this last extremity are subjects of consolation for our holy mother the Church.

There are actually under our care in the Roman Catholic chapel, on the 1st April of this year, 335 convicts.

Believe me, dear sir,

Yours faithfully,

A. MARTIN,
Roman Catholic Chaplain.

DORCHESTER.

DORCHESTER, N.B., March 31, 1914.

SIR,—With the closing of the fiscal year comes the reminder that the annual report of the Protestant chaplain should be placed in your hands.

It is an easy task to tabulate a summary of the year's statistics and events as they affect the duties of this office. But to form an estimate, or make a record of the possible good accomplished, from a moral or spiritual standpoint, during the year now closing, is in an emphatic sense an impossible undertaking.

We herewith submit the following:—

SUMMARY OF THE REGISTRATION.

Total number of Protestant prisoners in custody, March 31, 1913.....	102
Received during the year.....	59
Total.....	161
Discharged during the year—	
By time expiration.....	12
By parole.....	21
By pardon.....	1
Transferred to Roman Catholic chapel.....	1
Death, by suicide.....	1
Total in custody March 31, 1914.....	125
Registration by Creed—	
Church of England.....	42
Baptist.....	35
Methodist.....	25
Presbyterian.....	20
Greek Church.....	1
Lutheran.....	2
Total.....	125

The year has not been without instances of very real encouragement. There have been at least two noteworthy cases of conversion. One of these individuals received the sacred rite of baptism, and with others partook of the Holy Communion.

In connection with personal interviews which are granted each week, we have had some most uplifting experiences, and our faith in the Old Gospel greatly strengthened.

Sickness in serious form, with two or three exceptions, has not been in evidence during the year.

Death invaded our ranks once during the year; we refer to the case of suicide, the body was interred in the government burial plot, after brief religious exercises, conducted by the chaplain.

The discipline of the institution is held at a high standard, as is evidenced by the utmost decorum at all the gatherings in our chapel.

Our choir is stronger than usual, and the singing under the direction of our efficient organist has never been excelled in the past seven years.

We miss the genial presence of our colleague, the Roman Catholic chaplain, Rev. A. D. Cormier, who resigned the latter part of the fiscal year, after a term of service extending over a period of twenty-nine years. He was a good man, and displayed much zeal in the labours of the sacred office.

SESSIONAL PAPER No. 34

A celebrated divine, standing upon the piazza of a summer hotel, and gazing into the black clouds of a passing thunder-storm, was asked by a guest what he saw; he immediately replied: "I see the hand of the Eternal God, who has woven the rainbow into a scarf of many colours, and thrust it upon the shoulders of the dying storm."

If asked, as I stand looking into the faces of a hundred and twenty or more, men and women, sin blighted and sorrowful, what I see, my answer is immediate: "I see the unchangeable Son of God, who stands with outstretched hands, ready to thrust the garments of righteousness upon the shoulders of earth's most needy sons and daughters."

With the spirit of unbounded optimism, we face the duties of the incoming year, with all our hopes centered upon the ever-conquering gospel of Jesus Christ.

We are grateful to you and every member of the staff, for unnumbered courtesies shown the writer throughout the history of the year.

Yours obediently,

BYRON H. THOMAS,
Protestant Chaplain.

ST. JOSEPH, N.B., May 8, 1914.

SIR,—My appointment as chaplain to the inmates of Dorchester penitentiary, dating only from April 1st, accounts for the delay of this year's report.

Such a brief period in active service barely gives time to grasp fully the moral state of the inmates; but I must confess that, whether it be due to the Rev. A. D. Cormier, or to the happy influence of the officers in charge, the moral disposition of the convicts is very satisfactory. It is pleasing to note that my worthy predecessor has to his credit, from the part of the inmates, a lasting memory of his stay amongst them, in the form of respect toward religion and authority. Their attention, conduct, and general demeanour in all instances relative to my duty are most commendable. I feel indebted to your kindness to me on all occasions, whether in connection with the exercise of my duty or otherwise. I will add that I feel no less obliged to the courteous manners on the part of every member of the staff.

The number of Roman Catholic convicts detained on March 31, 1914, was 106, as against 93 for the preceding year; one death occurred during the year, this being under the Rev. A. D. Cormier's chaplainship.

Yours respectfully,

D. J. LEBLANC, C.S.C.,
Roman Catholic Chaplain.

5 GEORGE V, A. 1915

MANITOBA.

April 1, 1914.

SIR,—During the past year services have been held regularly. Hospital and cell visitation has been conducted as opportunity allowed. Instruction in religious matters has also been carried on. In this connection I desire to mention that some who, on entering this institution, were unable to read a word, since attending the school here have learned to read, and have become deeply interested in reading the scriptures.

I commend your effort to extend the usefulness of the school, and would urge that it be enlarged to its greatest possible scope.

I must still deplore the moral effects of the stone shed; the utter lack of mental employment in stone-breaking tends to cause mental degeneracy and moral corruption, and I long for the day when the stone shed will be for disciplinary purposes only.

The greatest hope in moral reformation lies in healthy, useful employment for both body and mind; and in this hope we are encouraged by the report of the inspectors on the labour question in our last annual report.

The following has been the movement and classification of prisoners under my care for the past fiscal year:—

In closing, I desire to thank you and your staff for the many courtesies extended to me during the past year.

Respectfully submitted,

S. W. L. STEWART,
Protestant Chaplain.

STONY MOUNTAIN, Man., April 4, 1914

SIR.—Having the pleasure to report for the first time as Roman Catholic chaplain of this institution, I beg to submit the following items:—

On March 31, there were seventy-four convicts under my care, the great majority of whom are foreign born. The remarks of the last chaplain, now the Right Reverend Bishop Beliveau, with reference to such a numerous foreign element, in my opinion, still hold good. They can be read in the 1913 report.

I am pleased to say that our dear inmates have been anxious to take advantage of the spiritual help given them so freely by their Holy Mother the Church and rendered possible by the kind co-operation of a Christian State. They are not satisfied with attending Holy Mass and other services with true piety, but they are also zealous in going to confession and receiving Holy Communion frequently, which has been for me a source of comfort and deep satisfaction. For I believe more than ever in the reformation and betterment of those who are willing to employ the most efficacious means therefor.

Thanking you and your worthy officers for the courtesy shown to me in the discharge of my duties, I remain,

Truly yours,

JOSEPH VICTOR JOUBERT,
Roman Catholic Chaplain.

5 GEORGE V. A. 1915

BRITISH COLUMBIA.

NEW WESTMINSTER, B.C., April 1, 1914.

SIR,—I beg herewith to present to you my report as Protestant chaplain for the year ending March 1, 1914:—

Total.....	263

The foregoing figures show an increase of twelve in the number of men received during the year, and an increase of thirty-two in the number of prisoners under my charge at present.

The usual religious services have been conducted every Sunday morning.

The conduct of the men in chapel, their quiet reverence and attention, indicates clearly their appreciation of the privilege.

The presence of a small orchestra on Christmas morning rendered the service particularly bright and cheerful.

I wish to thank our organist and the gentlemen who so kindly contributed to this result.

The sacrament of the Lord's Supper was dispensed twice during the year, and the attendance was encouraging.

During the year the hospital has been visited regularly, and many men have had private interviews with me in my office.

In every way possible, consistent with the regulations, I have endeavoured to be of assistance to the men under my charge.

I have to thank the members of the staff for the courtesy extended to me in the discharge of my duties.

Respectfully submitted,

ALBERT EDWARD VERT,
Protestant Chaplain.

SESSIONAL PAPER No. 34

NEW WESTMINSTER, B.C., March 31, 1914.

SIR,—I submit herewith report for the year ending March 31, 1914:—

At the beginning of the year, 120 Catholic convicts were enrolled; at the end there are 111.

Among the forty-two admitted, one was well-grounded in his faith, a few had imperfect knowledge, but the majority were perfectly ignorant of Catholic doctrine.

The singing during divine service has been greatly improved, thanks to the efforts of the new organist.

I can, once more, only deplore the fact of the admission of young offenders into this institution, who find themselves mixed with criminals of the lowest type.

From my personal observation during these three years, I am more than ever inclined to think that the work of reform in the penitentiary will be really effective when the system of segregation will be adopted.

Yours respectfully,

E. MAILLARD, O.M.I.,
Roman Catholic Chaplain.

5 GEORGE V, A. 1915

ALBERTA.

EDMONTON, ALBERTA, April 1, 1914.

SIR,—I have the honour to submit to you my report for the year ended March 31, 1914.

Religious services have been conducted every Sunday morning, and I have reason to believe that these and other ministrations have benefited many of the men under my care during their confinement, but especially while out on parole or after their term has expired has the most fruitful work been done.

The organist and choir, composed entirely of prisoners, still continues to render valuable assistance in the service.

The Church of England and the Salvation Army, by special request, have assisted in the services, and the latter give valuable assistance in looking after the men when their term expires.

The women of the W.C.T.U. regularly hold a service on Sunday afternoon among the prisoners in the female ward, which is much appreciated by the unfortunate women.

In conclusion, I wish to thank the warden and all the officials for their uniform kindness and courtesy to me in the discharge of my duties.

Yours respectfully,

D. G. McQUEEN,
Protestant Chaplain.

EDMONTON, ALBERTA, April 1, 1914.

SIR,—I have the honour to present to you my report for the year ending March 31, 1914.

The actual number of Catholic convicts stands as follows: men 64, women 6; of different nationalities, English, Irish, French, German, Half-breed, and Ruthenian.

Mass and sermon are given on every Sunday and feast day of obligation, and attended by all the Catholic convicts, who assist at the divine services with respect and attention. About all the Catholic convicts have this year fulfilled their Easter duties.

At the request of a few Catholics, unfamiliar with the English or French languages, German or Ruthenian priests at different times during the year exercised their ministry with those people.

Allow me to tender my hearty thanks to the warden and to all his officers for the delicate attention that they have at all times extended to me.

Yours respectfully,

J. A. ETHIER,
Roman Catholic Chaplain.

SESSIONAL PAPER No. 34

SASKATCHEWAN.

PRINCE ALBERT, SASK. March 31, 1914.

SIR,—I beg to leave to present to you my report for the year ending 31st March, 1914.

Divine service has been held regularly every Sunday, and visits made to the cells every week during the year.

A number of new books were added to the library last summer, and are much appreciated by the prisoners.

I am pleased to be able to report that some of the men who have had the privilege of being “paroled” have found good employment and are now trying to redeem the past by living honourable and useful lives.

I have to thank you and all the officers under you, for the help I have received during the year, while discharging my duties in the penitentiary.

Yours truly,

JAMES TAYLOR,
Chaplain.

5 GEORGE V, A. 1915

In presenting this my third annual report permit me to extend to you hearty greetings, more than ever, since your arrival, and more particularly under the direction of Colonel W. S. Hughes, Inspector of Penitentiaries, I consider our local place of detention as a truly corrective measure for the purpose of helping our fallen fellow-beings, by developing whatever good may be in them.

Every Sunday, services have been conducted. Visits have been made regularly and the more I come in contact with those unfortunate inmates, the more I understand the influence of the church for those derelicts of society.

I am glad to say I endeavoured in my conversations, as well as in my instructions on each Sunday, to help this, our institution, in its work for the uplift of those confined therein, most particularly in the hope of amendment.

Practically all Catholics here have made their Easter duty, and it was a consolation for me to distribute the Holy Communion to the majority of them at Christmas and on other occasions.

I thank the department for sending, with your approval, French books, they being a great help to our French-speaking inmates.

In conclusion, I have to say, nearly all convicts under my charge seem to appreciate the Word of God as preached to them.

Thanking you for your kindness and appreciative of the gentlemanly demeanour of my fellow officers.

Respectfully submitted,

EMILE PASCAL, O.M.I.

Chaplain.

APPENDIX E.

SCHOOL INSTRUCTORS' REPORTS.

KINGSTON.

To the Warden,—

SIR,—I have the honour to submit the report of the school in this penitentiary, for the year ending March 31, 1914.

The total number enrolled during the year was sixty-seven; of this number nine passed out capable of reading, writing and arithmetic; thirteen retired at expiration of sentence. Present attendance, forty-five.

The studies of these are as follows:—

Reading in Part I.....	5
Reading in Part II.....	8
Reading, second book and writing.....	21
Reading, third book, writing and arithmetic.....	11
	45

H. W. WILSON,
School Instructor.

5 GEORGE V, A. 1915

ST. VINCENT DE PAUL.

SIR,—I have the honour to submit to you my annual report for the English school of this penitentiary for the year ended March 31, 1914.

During the year thirty-five pupils were enrolled for the English class. They were taught reading, writing, spelling and arithmetic.

The convicts behaved very well in the class-room.

Convicts who wished to study in their cells were supplied with the necessary books, etc.

I beg to tender thanks to my superiors for their assistance in the discharge of my duties.

Yours respectfully,

D. O'SHEA,
English School Instructor.

SIR,—I have the honour to submit my annual report for the fiscal year ending March 31, 1914.

During the year, twenty-seven convicts were admitted to be taught French. At the end of the year, eleven were still attending school. The pupils were taught spelling, reading, writing and arithmetic. The convicts were very attentive to lessons, and their conduct has been very good. Books and slates were supplied to convicts who wished to study in their cells.

I must offer my sincere thanks to the authorities of this institution for their kind support in the discharge of my duties.

I remain, sir,

Your obedient servant,

G. J. RENEALT,
French School Instructor.

L. O'SHEA.

DORCHESTER.

DORCHESTER, N.B., April 1, 1914.

SIR, I have the honour to submit my annual report for the year ended March 31, 1914.

At the beginning of the year the school was attended by thirty-three pupils. The present attendance is forty-seven, divided as follows:—

Arithmetic only.....	2
Reading, writing, and arithmetic.....	25
Reading and writing.....	12
Reading only.....	8

Fourteen are reading in the Fourth English Reader; seven in the third; eight in the second, ten in the first, and six in the primers.

I am pleased to say that most of the pupils have made good progress, and their conduct and industry during school hours have been very satisfactory.

I beg to express my sincere thanks to yourself and other officers for the assistance given me in the discharge of my duties.

G. B. PAPINEAU,
School Instructor.

G. B. PAPINEAU,
Librarian.

MANITOBA.

SIR,—I have the honour to submit my annual report of the school and library for the fiscal year ending March 31, 1914.

Of the forty-seven pupils attending school during the year, six were Canadians, one French, three Russians, four Finlanders, one Persian, ten Italians, and twenty-two Austrians. The attendance at the close of the year was twenty-seven, classified as follows:—

First reader, part I.....	8
First reader, part II.....	8
Second reader.....	8
Third reader.....	3

Arithmetic and geography were also taught. All convicts, if so desiring, are supplied with school books and slates for the purpose of studying in their cells. The conduct and industry during school hours have been satisfactory. School was held on 236 days, with an average daily attendance of twenty-three.

In conclusion, I beg to express my thanks to all in authority for the assistance given me in the discharge of my duties.

I have the honour to be, sir,

Your obedient servant,

J. H. DAIGNAULT,
School Instructor.

SESSIONAL PAPER No. 34

DORCHESTER.

To the Warden,—

SIR,—I herewith submit my report for the year ending March 31, 1914.

The past summer was favourable to the growth of crops, and all were fully up to the average, except hay on the marsh, broad-leaf being especially light. With the exception of a wet spell at the commencement of haying, the weather was good, and hay and grain went into the barns in good condition.

During the year, 15 acres of new marsh was purchased, on which a gang of men worked for a considerable part of the summer. This piece of marsh had no work done on it for years, and the ditches were in a bad condition; these had to be cleaned out and straightened to correspond with the adjoining marsh and facilitate the removal of surplus water. A great deal of work has yet to be done before it is put in shape.

Owing to the new marsh taking so much time, there was not much done towards improving the upland, and the rough pasture land we started to break up over a year ago is still unfinished. We hope to be in a position during the coming summer to finish this necessary work.

At all seasons of the year the piggery is overcrowded, and additional room is needed. The new root cellar also requires some attention to make it frost-proof. Two of the horses have outlived their usefulness, and will have to be replaced; one of them is about 25 years old, and the other badly spavined.

Thanking you for your continued support in carrying the work successfully along.

Respectfully submitted,

ANDREW MCPHERSON,
Farm Instructor.

MANITOBA.

April 1, 1914.

To the Warden,—

SIR,—I inclose herewith my balance sheet for the past year for the farm in connection with this institution.

The amount of grain produced was 4,451 bushels of oats and 692 bushels of barley, not so large a crop as that of the previous year, it being necessary to summer-fallow about 100 acres of land on account of the strong growth of noxious weeds.

In addition to the grain, a large quantity of turnips and other vegetables were supplied for prison use. Over a thousand dollars' worth of pork was supplied, and nearly a thousand dollars' worth of hogs were raised and sold. The hay season produced about 140 tons.

Our horses have been kept busy during the year on the road and general farm work. I have paid particular attention to the land with a view to future production, and it is at present in first-class shape, and, with favourable weather, we should have a large crop next year.

Respectfully submitted,

J. P. ROBERTSON,

Farm Instructor.

BRITISH COLUMBIA.

To the Warden,—

SIR,—I have the honour to submit my annual report for the year ending March 31, 1914.

The crops on the whole this year were of a very fair average, the potatoes being very good, indeed. I am pleased to state that I have been able to supply the penitentiary with all the pork required, and when the new piggery, which is now under construction, is completed, I anticipate more satisfactory results. The old piggery was too small and of antiquated construction.

I have again to call your attention to the necessity of clearing and cultivating more land, in order that the farm may be able to meet all requirements of the penitentiary. The crops this year were not sufficient to supply the demand, more vegetables could be used by the convicts.

The soil being of a gravelly nature requires considerably more manure than we at present are able to give it.

Respectfully submitted,

R. DYNES,
Farm Instructor.

SESSIONAL PAPER No. 34

SASKATCHEWAN.

To the Warden,—

SIR,—I have the honour to submit my annual report for the fiscal year ending March 31, 1914.

The crop taken from the farm was not as good as might have been.

The greater portion of the land cropped was originally in an extremely dirty condition, and up to the time of seeding it had not been possible to get it in a fit and proper condition whereby a good crop could be expected. It is proposed during the coming year, however, to seed this old land down with timothy and rye grass, which will greatly improve its productiveness in the future, and at the same time give us a considerable supply of hay.

We have during the past year had some 100 acres cleared and broken, and this land will be cropped this season.

Considerable land previously under water has been drained this fall, and will be broken and put into crop this year.

During the winter the teams have been kept busy hauling sand and gravel for the completion of the new cell block and also sufficient tamarac piles for the foundations.

Enough tamarac posts have also been hauled in to give us a good start on the fencing of the reservation.

Some 300 cords of wood have been cut on the reserve and brought in for use in the brickyard.

Respectfully submitted,

P. D. CHAPMAN,

for Farm Instructor.
